

Industrial Hygiene & Bloodborne Pathogens

1 Who Should Attend . . .

This program is a must for anyone concerned about health and safety on the job including:

- ▶ Managers concerned about liability and workers' compensation costs
- ▶ Employees who want to learn proper techniques for protecting their safety and health at work
- ▶ Business owners who want to learn about compliance with MIOSHA

2 Why you need this Seminar . . .

- ▶ To reduce disabling injuries and illnesses to employees - and to ensure that every worker goes home safe and healthy every day.
- ▶ To reduce the high direct costs of work-related injuries, which grew to \$42.5 billion nationally in 2000, and indirect costs, which were estimated at an additional \$127 - \$212 billion in 2002. (*2003 Liberty Mutual Safety Index.*)
- ▶ To enhance your company's bottom line. A strong safety and health commitment not only protects workers, it also reduces worker's compensation costs, improves employee morale, and increases production and quality.

3 What You'll Learn . . .

This program presents two topics. The industrial hygiene portion of the program will focus on the anticipation, recognition, evaluation and control of seemingly invisible hazards. Biological, physical, and chemical hazards in the workplace will be discussed. The bloodborne pathogens portion of the program will discuss complying with MIOSHA's amended Bloodborne Infectious Diseases standard and Centers for Disease Control recommendations. Tools to assist in the evaluation, control and prevention of bloodborne infectious diseases in the workplace will be discussed.

Agenda

We offer a flexible program agenda to emphasize the topics you want most.

- ▶ Overview of the MIOSHA amended Bloodborne Infectious Diseases Standard
- ▶ Overview of types of safer medical devices: pros and cons
- ▶ Project: Review of hypothetical scenarios and selection of devices
- ▶ Overview of Hepatitis, the vaccinations, and post-exposure prophylaxis

Facilitator

Sherry Scott has spent her entire State of Michigan career of fourteen years as an Industrial Hygienist with MIOSHA. Before her assignment to the Consultation Education and Training Division, Sherry served in a compliance capacity for the Occupational Health Division in both the Asbestos Program and Lansing District 6. In these assignments, Sherry conducted investigations of alleged occupational health hazards in the state program in industrial facilities and at construction sites in both the public and private sectors.

Assigned to Consultation Education and Training in 2000, Sherry's past work experience provide her with a practical simplicity in her current role as an industrial hygiene consultant. Her goals include the prevention of occupational disease and improving work environments in Michigan through education and training; along with the promotion of programs to achieve voluntary compliance with occupational health regulations.

Sherry earned an undergraduate degree in Industrial and Environmental Health Management from Ferris State University.

Sherry Scott
*Industrial Hygienist,
MIOSHA, CET Division*
